And Verification  
Communication  
Protocol Specification  
and Verification is  
written to address the two  
issues discussed above:  
the needs to specify a  
protocol using an FDT  
and to verify its  
correctness in order to  
uncover specification  
errors in the early stage of  
a protocol development  
process. The readership

model of protocols.

Protocol specification  
requires a clear definition  
of both the services to be  
provided by a given  
protocol layer and the  
protocol entities within  
the layer that cooperate  
to provide the service.

Verification, then,  
consists of two parts: (1)  
showing that the entities

and ...

Protocol verification consists of showing that two (or more) entities satisfying the protocol specification will provide at their service interfaces the specified service of that layer. The (verified) protocol specification is used mainly for the following two activities:  
The development of an entity implementation.
